INTELLIGENT ACCOUNTS PAYABLE AUTOMATION FOR TELECOMS

Saninco Technologies announces the availability of ap keeper

Toronto, ON, Canada: Saninco Technologies announces the availability of *ap keeper*, an intelligent, cloud-based accounts payable automation service for the telecommunications industry and other industries too.

A “**Great Tool**” that helps “**Great People**” make their AP departments even better.

ap keeper removes the manual tasks involved in the AP process and uses powerful automation features to help improve AP procedures and increase productivity. In addition to automating the standard AP processes, *ap keeper* handles the specific needs of the telecom industry, including circuit leasing and all cost components and line items.

With this announcement, Steve Xia, President of Saninco Technologies said, “*ap keeper* is a mature product and we wish to make it more widely available.”

Customer Diane Jolin, Manager, Carrier Cost for Rogers Communications, one of Canada’s largest telecom companies said, “We have been using this highly beneficial and reliable service for 5 years,” and added, “The service has allowed us to focus on making better AP decisions resulting in more productive staff, enhanced cost control and improved relationships with our vendors.”

ap keeper is available as a subscription-based software service and can be accessed via PC, laptop, tablet or smartphone from anywhere with access to the internet. More information is available at www.apkeeper.com.
